

CAPABILITY STATEMENT

GENERAL INFORMATION

EIN : 20-3438287
DUNS : 608599358
CAGE : 70J55
GSA #: # GS-35F-434CA

CERTIFICATIONS

- **Woman Owned**
- **Minority Owned**
- **Small Business**
- **SBA Certified WOSB**
- **WBENC**

NAICS CODES

541511	Custom Computer Programming Services
541512	Computer Systems Design Services
541513	Computer Facilities Management Services
541519	Other Computer Related Services
611420	Computer Training
518210	Hosting & Data Processing Services

COMPANY OVERVIEW

A Colorado company with expertise in Machine learning and data science and a mission to create value for organizations. Decision Products uses cutting edge machine learning algorithms and AI based on graphs to augment and automate decisions in an automated digital workflow.

CORE COMPETENCIES

Building decision products, recommendation engines, and other solutions integrating machine learning and AI to create value. Core expertise in Graph Databases, Cloud computing Services and prototyping solutions

DECISION PRODUCTS

We offer four API decision products based on synthetic intelligence to augment and automate decisions

ASSUMPTIONSpRO

Updating supply chain assumptions to reflect ground reality. Value add – Reducing on- hand inventory

DEEPCASTpRO

A forecasting engine using sophisticated deep learning networks

MARGINpRO

A deep learning engine to identify transactional anomalies.

INSIGHTSpRO

A deep learning engine that learns from textual data to build ontologies and knowledge hierarchies.

DECISION CONSULTING

For enterprises with more complex data science needs we offer three different types of consulting services.

DATA SCIENCE & AI

For well defined business problems we build machine learning pipelines to train predictive and forecasting models using various ML techniques.

CLOUD COMPUTING

Ideation, prototyping and building models with synthetic data is feasible for harder and ill defined problems.

BUSINESS PROCESS IMPROVEMENT

For realizing bigger benefits, it is not just enough to build models but integrate these AI engines into the process to enhance collaboration.

PAST PERFORMANCE

HealthCare & Fintech

Built recommendation products for health care plan choice, insurance risk prediction and financial forecasting

Media

Built prediction models and recommendation engines for various business functions

Fraud Detection

Building an anomaly detection engine for identifying Fraud in near real time using Graphs.

DIFFERENTIATORS

- Unique blend of business expertise and IT skills with proven track record in creating value.
- Building Recommendation Engines and Decision products for various industries
- Expertise in AI, Graph Databases and building recommendation systems for augmenting and automating decisions
- Expertise in Big Data Analytics and various Cloud platforms.
- Long track record of implementing business transformative solutions using technology.
